

Kevin Anugerah Faza

Surabaya, Indonesia | kevinanugerahf@gmail.com | [LinkedIn: Kevin Anugerah Faza](#) | [kevinanugerah.dev](#)

EDUCATION

Institut Teknologi Sepuluh Nopember

2023 – 2027 (Expected)

Bachelor of Computer Science, Information Technology, 3.80/4.00

Relevant Coursework: Artificial Intelligence, Database System, Big Data & Lakehouse

PROFESSIONAL EXPERIENCE

AI Top Trends – Surabaya, Indonesia

Aug 2026 - Present

AI Developer Intern

- Built an evidence-driven AI news intelligence pipeline with multimodal mechanism by implementing source ingestion, deduplication, story clustering, evidence validation, provenance tracking, and validation status gates
- Generated validated Bahasa Indonesia daily summaries and evidence-grounded Markdown articles with idempotent retries and partial-failure handling, achieved 129 passing tests and successful live source connections.
- Validated AI generation quality across Gemini embedding and article pipelines, implemented retry/backoff with Retry-After handling, and confirmed 100% pipeline success on live E2E runs

PT PAL Indonesia – Surabaya, Indonesia

Dec 2025 - Feb 2026

AI Engineer Intern

- Engineered a production-ready RAG chatbot with a 1.5B local LLM, FastAPI, vLLM, ChromaDB, BM25/RRF, reranking, PostgreSQL, and Next.js, achieving 86.67% Context Recall and 78.89% Context Precision.
- Developed a Telegram-integrated Text-to-SQL application using Ollama and ClickHouse to transform Bahasa Indonesia natural-language business questions into SQL-powered insights.
- Implemented secure AI workflows with read-only access, input guardrails, SQL/column validation, scripted commands, adaptive formatting, CSV export, and 100% execution success on hard-level test cases.

Avalon AI – Surabaya, Indonesia

Feb 2024 - Present

Machine Learning Engineer

- Conducted research on Gradient Boosting Tree algorithms, LLM architectures, and RAG methodologies for model optimization, domain-specific retrieval, and practical AI implementation.
- Authored research work on SahabatAI-based RAG for legal contexts, exploring Indonesian open-source LLMs for contextual legal information retrieval and generation.
- Participated in weekly ML Tweaks sessions to improve model performance, evaluate experiments, and establish machine learning coding best practices.

Cyber Security and Smart City Laboratory – Surabaya, Indonesia

Vice Head

Jan 2026 – Present

- Spearheaded Data Science and AI research initiatives within the laboratory, supporting applied research and technical development in smart city and cybersecurity domains.
- Designed and deployed a RAG-based Laboratory Chatbot using Large Language Models to improve internal knowledge access and question answering.
- Implemented model auto-routing to optimize chatbot accuracy, efficiency, and response quality across different query types.

Assistant Lecturer of Artificial Intelligence / Machine Learning

Feb 2026 – Jul 2026

- Assisted in delivering AI/ML practicum modules covering data preprocessing, supervised and unsupervised learning, deep learning for image and text, and generative AI.
- Mentored students in building and evaluating Python-based machine learning models across tabular, text, and image-based tasks.
- Supported CNN, RNN/LSTM/GRU, Transformers, multimodal learning, and RAG topics while reviewing model performance and implementation quality.

Assistant Lecturer of Data Communications and Computer Network

Aug 2025 - Jan 2026

- Assisted in delivering networking practicum modules covering subnetting, routing, network configuration, firewall concepts, and IPTables.
- Guided students in implementing and troubleshooting network topologies using Cisco Packet Tracer and GNS3.
- Provided structured technical support on IP addressing, static routing, connectivity testing, and network security fundamentals.

Assistant Lecturer of Database Systems

Jan 2025 - Jul 2025

- Assisted in delivering database systems modules covering ERD design, normalization, MySQL DDL/DML, triggers, stored procedures, functions, JSON, and MongoDB.
- Guided students in relational schema design, SQL query writing, and database implementation debugging.
- Supported module exercises and assessments to strengthen students' understanding of relational and NoSQL database concepts.

Assistant Lecturer of Algorithms & Programming Techniques

Aug 2024 - Dec 2024

- Delivered C programming practicum materials covering syntax, control flow, arrays, functions, recursion, pointers, structs, sorting, and searching.
- Assisted students by explaining algorithmic thinking, debugging logic errors, and strengthening structured programming fundamentals.
- Supported module-based exercises and practicum activities to progressively build programming proficiency from basic syntax to algorithm implementation.

ORGANIZATIONAL EXPERIENCE

Google Developer Groups on Campus ITS – Surabaya, Indonesia

Oct 2025 - Present

Lead Chapter

- Led 800+ members and 29 Core Team Staff across AI, Cyber Security, Cloud Development, and Web Development tracks.
- Planned and executed tech programs, workshops, and project-based learning activities to strengthen members' practical developer skills.
- Achieved Top 3 GDGoC Indonesia in national registration for #JuaraVibeCoding, contributing to outreach, participant engagement, and community activation.

A Renewal Agent 7.0 ITS – Surabaya, Indonesia

Aug 2025 – Mar 2026

Project Officer

- Directed 13 cross-functional divisions with 170+ members to execute ARA 7.0, covering Roadshow, IT Olympiad, CTF, Data Science

Competition, and IT Expo “Exploit.”

- Established a national Data Science Competition as a new flagship event, securing the highest number of participants across the entire event portfolio.
- Increased competition registrations by 60% on average, grew event finances by 100%+, and improved social media performance by 3x.

Himpunan Mahasiswa Teknologi Informasi ITS – Surabaya, Indonesia

Jan 2025 - Jan 2026

Research and Technology Staff

- Coordinated AI Club learning sessions and peer mentoring on machine learning, deep learning, and generative AI.
- Served as PIC of LKMM-TD HMIT ITS in collaboration with BEM ITS, achieving a 100% participant pass rate.
- Awarded Staff of the Year for outstanding contribution and consistency.

SELECTED PROJECTS

19MJ AI Job Matching Platform

React, Express, PostgreSQL, LLMs API

- Built an AI-powered recruitment platform integrating CV analysis, fit scoring, candidate ranking, interview transcription, and candidate summarization workflows.
- Developed candidate and company workflows with React.js, Express.js, PostgreSQL, file upload handling, and AI orchestration for LLM/STT-based features.

Hybrid RAG Chatbot for documents

FastAPI, vLLM, Reranker, PostgreSQL, Redis, PostgreSQL

- Built a production-ready internal RAG chatbot for text-based PDF documents, combining semantic retrieval, keyword search, reciprocal rank fusion, reranking, and local LLM inference to deliver grounded answers with document sources.
- Developed the end-to-end system including document ingestion, PDF processing, vector indexing, chat API, user management, logging, monitoring, and a Next.js admin dashboard; achieved 86.67% Context Recall and 78.89% Context Precision.

Executive Data Assistant Bot

Ollama, ClickHouse, Telegram API

- Developed a Telegram-based Text-to-SQL assistant that converts Bahasa Indonesia business questions into SQL-powered insights from ClickHouse, supporting both natural-language queries and scripted business commands.
- Implemented read-only database access, input guardrails, SQL/column validation, command routing, adaptive table/card formatting, and CSV export, achieving 100% query execution success rate on hard-level relational database test cases.

Material Property Prediction - International Regression Challenge

Pandas, NumPy, Scikit-learn, Gaussian Regression

- Developed a piecewise Gaussian Process Regression pipeline for material-property prediction, including exploratory data analysis, preprocessing, validation, and model optimization.
- Achieved a 0.13689 leaderboard score and won 1st place.

ACHIEVEMENTS

1st Place Winner – Spring 2025 Regression Challenge International Kaggle Competition. Built a piecewise Gaussian Process Regression solution for material-property prediction, achieving a 0.13689 leaderboard score.

3rd Place Winner – Data Science International Category by Universitas Kristen Satya Wacana. Developed flood segmentation and crop recommendation models, achieving 0.8771 IoU and 99.70% accuracy.

CERTIFICATIONS

AI Engineer for Developers Associate - DataCamp, 2026

AI Engineer for Data Scientists Associate - DataCamp, 2026

Data Engineer Associate - DataCamp, 2026

Data Scientist Associate - DataCamp, 2026

Panduan LLM untuk Developer: Dasar hingga Aplikasi Praktis - Udemy, 2025

Python Fundamental for Data Science - DQLab, 2025

SKILLS

Programming Languages: Python, SQL, TypeScript, C/C++, Bash

Frontend: Next.js, React.js, Tailwind CSS, REST API Integration

Backend & API: FastAPI, Telegram Bot API, REST API, Celery, Redis, Prefect, Uvicorn, HTTPX, Feedparser, Trafalura

Cloud Platforms: GCP, AWS, Digital Ocean, Vercel, Netlify

Data & Databases: PostgreSQL, MongoDB, MariaDB, ClickHouse, MySQL, Kafka, Spark

AI / ML Domains: Machine Learning, Deep Learning, Generative AI, LLM, RAG, Prompt Engineering, NLP, Computer Vision, VLM

AI Frameworks & Tools: Pandas, NumPy, PyTorch, Scikit-learn, Hugging Face Transformers, LangChain, LlamaIndex, Ollama, vLLM, LM Studio, RAGAS

Systems & Infrastructure: Docker, Git, GitHub Actions, Kubernetes, Linux/WSL, MLflow, Ollama, vLLM, LM Studio

Languages: Indonesian (Native), English (Institutional English Test Score: 530)
